1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Evans on 2/17/05.

The application has been amended as follows:

In Claim 38, line 6, the term "at least" has been added after the term "molecular weight of".

Claims 39-47 have been amended to depend from Claim 38 as recited in the preliminary amendment adding these claims, dated 3/3/04, not from canceled Claim 1 as recited in error in the subsequent amendment filed 2/1/05.

2. The following is an examiner's statement of reasons for allowance: as recited in the parent case, USPN 6,730,409, which has been overcome by the proper filing of a terminal disclaimer, the closest prior art Osada et al (USPN 3,836,437) teaches a surface treatment for aluminum plates, including aluminum alloy plates such as aluminum alloys with copper, which can be used as building material or a printing plate support, wherein the aluminum plate is coated with an aqueous solution comprising a water-soluble high molecular weight compound, such as water soluble carboxymethyl cellulose, and water soluble polyacrylamide having a molecular weight of from about 10,000 to about 500,000, better yet from about 50,000 to about 150,000, wherein an image forming layer is provided by coating the water-soluble layer with a light-sensitive high molecular weight compound, including methacrylate polymeric materials, which can be dissolved in a suitable organic solvent such as cellosolve acetate, imagewise exposing the

light-sensitive layer to yield insoluble exposed areas and then removing the non-exposed areas with a suitable organic solvent. Osada et al do not teach or render obvious that the plate to be subjected to the surface treatment is a dielectric substrate with a metallic or aluminum surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Monique R Jackson whose telephone number is 571-272-1508. The examiner can normally be reached on Mondays-Thursdays, 8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on 571-272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
